

# Scene Judging Criteria

A Theatrical Scene is designed to judge how well auditioners build a stage scene together.

**Vocal Characterization.** How well were vocal choices made to convey the character in the scene?

**Physical Characterization.** How well were physical choices made to convey the character in the scene?

**Character Believability.** How well were you able to believe that this actor was the character they were performing?

**Dramatic Build up.** How well did the piece itself build up to something dramatic?

**Dramatic Impact.** How effectively did the piece deliver a dramatic payoff?

**Character Connection.** How effectively did the two performers work off of each other?

Was the piece written for the stage? We discourage songs from any medium other than stage plays. Scenes from film are discouraged.

**Appropriateness.** Was the language appropriate for a piece that will be performed in front of high school students and their parents? We discourage profanity. If profanity is used please give this area a zero.

Was the piece written for the stage? We discourage songs from any medium other than stage plays. Monologues from film are discouraged.
